Allowable Subject Matter

Claims 12-24 are allowed.

The following is an examiner's statement of reasons for allowance: in addition to the reasons cited in the non-final rejection for the allowance of claims 12-14, the prior art additionally fails to show or fairly suggest a substrate with a cavity on which resides a bulk acoustic wave filter further comprising at least one wave filtering device with input and output terminals at opposing ends of the device and at least one micro-electro-mechanical switch releasably engaging the wave filtering device so that the bulk acoustic wave filter is switched off when said switch is in contact with it and on when it is not, and where the placement of the at least one wave filtering device and the at least one micro-electro-mechanical switch are connected to a first side of the substrate opposite to said cavity to the other side, and wherein the at least one micro-electro-mechanical switch controls the acoustic wave impedance generated by the bulk acoustic wave filter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
